

Phonological Awareness Series Disc 1: Listening & Rhyming

Listening & Rhyming provides activities from nursery rhymes through to rhyme generation at sentence level.

It offers practitioners working with children a resource to supplement therapy and teaching objectives, while giving children the opportunity to develop their listening and rhyming skills with fun, easy to access on and off screen tasks.

The programme includes:

- 100s of colour and black and white pictures for use in the classroom and therapy sessions.
- A bank of prepared worksheets for extra practice in key areas.
- An option to make your own worksheets to suit individuals or groups of children.
- On screen activities that can be adapted to meet individual needs.
- Support notes for teachers and parents.
- Reward certificates.
- Male or female voice option.
- Technical help available.

By developing the rhyming aspect of phonological awareness this programme supports pre-literacy skills so that the end user develops better reading and spelling skills.

The listening part of the disc increases awareness of everyday sounds and encourages attention and concentration which is the basis of all learning.

This disc provides assistance for classroom support staff and special educational needs staff. The flexibility of this disc allows for the preparation of Individual Education Plans.

The activities are designed to change with each visit so that the pupils can't simply remember the answers. All of the images have been drawn specifically for this resource and can be downloaded separately so that individual worksheets and games can be created to suit each individual.

Teaching subject: English, Foundation Stage

Key Stage: Foundation, Key Stage 1

School Year: Nursery, Reception, 1, 2

ISBN: 0-9546521-0-X
